JOURNAL OF ELECTROANALYTICAL CHEMISTRY AND INTERFACIAL ELECTROCHEMISTRY, VOLUME 225 (1987)

SUBJECT INDEX

Adriamycin,
electrochemical study of the mechanism and kinetics of reductive glycoside elimination of ——— adsorbed on a mercury electrode surface (Kano et al.) 187

Ammonia,
erratum on the determination of the shift between the potential scales in liquid ——— solutions and in aqueous solutions (Guyomard, Herlem) 263

Ammonium nitrate,
potentiometric study of the cadmium(II) –chloride and cadmium(II)–bromide association equilibria in ——— + dimethyl sulphoxide melts (Bombi et al.) 111

Anthraquinone,
electrocatalytic reduction of O_2 at electrodes modified by films of redox polymers with ——— moieties (Holdcroft, Funt) 177

Band electrodes,
electrochemical kinetics at microelectrodes. Part III. Equivalency between ——— and hemicylinder electrodes (Amatore et al.) 33
Theory of chronoamperometric curves at microband electrodes (Aoki et al.) 19

Bromide,
oxidation of chloride ions and ——— ions on ruthenium dioxide electrodes (Harrison, Hermijanto) 159
Potentiometric study of the cadmium(II) –chloride and cadmium(II)– ——— association equilibria in ammonium nitrate + dimethyl sulphoxide melts (Bombi et al.) 111

Cadmium(II),
potentiometric study of the ——— –chloride and cadmium(II)–bromide association equilibria in ammonium nitrate + dimethyl sulphoxide melts (Bombi et al.) 111

Capacitance relaxation method,
a ——— for studying surface states at the semiconductor–liquid junction (Kobayashi et al.) 79

Carbon dioxide,
formation of ethyl alcohol in the photocatalytic reduction of ——— by SiC and ZnSe/metal powders (Yamamura et al.) 287

Chloride,
oxidation of ——— ions and bromide ions on ruthenium dioxide electrodes (Harrison, Hermijanto) 159
Potentiometric study of the cadmium(II)– ——— and cadmium(II)–bromide association equilibria in ammonium nitrate + dimethyl sulphoxide melts (Bombi et al.) 111

1,2-Dichloroethane,
the double layer at the interface between two immiscible electrolyte solutions. Part III. Capacitance of the water/ ——— interface (Samec et al.) 65

Dimethyl sulphoxide,
potentiometric study of the cadmium(II)–chloride and cadmium(II)–bromide association equilibria in ammonium nitrate + ——— melts (Bombi et al.) 111

Dinitrogen tetroxide,
electrocatalysis of the nitration of naphthalene by ——— in aprotic media (Boughriet et al.) 125

Electrode–solution interface,
analysis of vibrational spectra of species adsorbed at the ———. A theoretical model for the effects of potential on the observed spectra (Schmidt et al.) 267

Ethyl alcohol,
formation of ——— in the photocatalytic reduction of carbon dioxide by SiC and ZnSe/metal powders (Yamamura et al.) 287

Folic acid,
adsorptive stripping voltammetric behaviour of ——— (Fernandez Alvarez et al.) 241

Glycoside,
electrochemical study of the mechanism and kinetics of reductive ——— elimination of adriamycin adsorbed on a mercury electrode surface (Kano et al.) 187

Hemicylinder electrodes,
electrochemical kinetics at microelectrodes. Part III. Equivalency between band and ——— (Amatore et al.) 33
Hydrogen adsorption states,
quantitative analysis of the distribution of the ——— at platinum surfaces. Part I. Application to Pt (100) in sulphuric acid medium (Armand, Clavilier) 205

Interface between two immiscible electrolyte solutions,
the double layer at the ———. Part III. Capacitance of the water/1,2-dichloroethane interface (Samec et al.) 65

Liquid junction potential,
experimental studies of the ——— between electrolyte solutions in different solvents. Part VI. Stability of the ——— (Izutsu et al.) 255

Mercury,
electrochemical study of the mechanism and kinetics of reductive glycoside elimination of adriamycin adsorbed on a ——— electrode surface (Kano et al.) 187
Methanol,
infrared spectroscopic study of the ——— adsorbates at a platinum electrode. Part I. Influence of the bulk concentration of methanol upon the nature of the adsorbates (Beden et al.) 215
Kinetic analysis of the oxidation of ——— at Pt-based electrodes by quantitative determination of the reaction products using liquid chromatography (Belgsir et al.) 281
Microelectrodes,
electrochemical kinetics at ———. Part IV. Electrochemistry in media of low ionic strength (Amatore et al.) 49
Electrochemical kinetics at ———. Part III. Equivalency between band and hemicylinder electrodes (Amatore et al.) 33
Theory of chronoamperometric curves at microband electrodes (Aoki et al.) 19
Monolayer formation,
linear sweep voltammetric approach for the study of ———. Distinct features of adsorption, nucleation–growth–collision and combined models (Noel et al.) 93

Naphthalene,
electrocatalysis of the nitration of ——— by N_2O_4 in aprotic media (Boughriet et al.) 125
Nickel hydroxide,
electroformation of thick hydrous ——— films through the application of periodic potential signals (Visintin et al.) 227
Nucleation–growth–collision,
linear sweep voltammetric approach for the study of monolayer formation. Distinct features of adsorption, ——— and combined models (Noel et al.) 93

Oxygel,
electrocatalytic reduction of ——— at electrodes modified by films of redox polymers with anthraquinone moieties (Holdcroft, Funt) 177

Platinum,
infrared spectroscopic study of the methanol adsorbates at a ——— electrode. Part I. Influence of the bulk concentration of methanol upon the nature of the adsorbates (Beden et al.) 215
Kinetic analysis of the oxidation of methanol at ——— -based electrodes by quantitative determination of the reaction products using liquid chromatography (Belgsir et al.) 281
Quantitative analysis of the distribution of the hydrogen adsorption states at ——— surfaces. Part I. Application to Pt (100) in sulphuric acid medium (Armand, Clavilier) 205
Poly-(3-methylpyrrole-4-carboxylic acid),
——— : an electronically conducting ion-exchange polymer (Pickup) 273

Potential scales,
erratum on the determination of the shift between the ——— in liquid ammonia solutions and in aqueous solutions (Guyomard, Herlem) 263

Ruthenium dioxide,
oxidation of chloride ions and bromide ions on ——— electrodes (Harrison, Hermijanto) 159

Semiconductor–liquid junction,
a capacitance relaxation method for studying surface states at the ——— (Kobayashi et al.) 79
Silicium carbide,
formation of ethyl alcohol in the photocatalytic reduction of carbon dioxide by ——— and ZnSe/metal powders (Yamamura et al.) 287
Solid binary electrolyte cells,
steady state current flow in ——— (Bruce, Vincent) 1
Sulphuric acid,
quantitative analysis of the distribution of the hydrogen adsorption states at platinum surfaces. Part I. Application to Pt (100) in ——— medium (Armand, Clavilier) 205

Titanium,
investigation of the ——— electrode in acid solutions and acid solutions containing uranium(VI) ions (Harrison et al.) 139

Uranium(VI),
investigation of the titanium electrode in acid solutions and acid solutions containing ——— ions (Harrison et al.) 139

Vibrational spectra,
analysis of ——— of species adsorbed at the electrode–solution interface. A theoretical model for the effects of potential on the observed spectra (Schmidt et al.) 267

Water,
the double layer at the interface between two immiscible electrolyte solutions. Part III. Capacitance of the ——— /1,2-dichloroethane interface (Samec et al.) 65

Zinc selenide,
formation of ethyl alcohol in the photocatalytic reduction of carbon dioxide by SiC and ——— /metal powders (Yamamura et al.) 287
